

## Wildau Method Course

### An Exciting New Idea to bring to your Program

The Wildau Method seamlessly integrates social and emotional, physical, and cognitive skill building and can be successfully incorporated into existing curriculum and diverse classroom settings. Come learn our techniques and strategies to have more fun while making greater connections with your students.

*Through interactive “hands-on” sessions, the learning goals are as follows:*

*Employing movement to connect motor learning with curriculum goal*

*Supporting children’s capacity to self-regulate through pretend play exercises*

*Successfully engaging with children as a play partner*

*Applying basic mime techniques for teaching specific subject content through movement*

*Keeping children engaged while managing transitions without losing the group*

*Problem solving and “thinking on your feet” strategies*

*Using space creatively for the successful application of Wildau Method activities*

Join us for Introduction night: January 30, 6:30-8:00 on Zoom to meet the instructor and learn about this course:

<https://us02web.zoom.us/j/81777514500>
